

DIAMOND MOUNTAIN RA 3809 FIELD INSPECTION FORM

DATE: 07/06/94 TIME: 1200 LOCATION: T.2S, R.25E, Sec. 14, Subdivision SWNW  
2S 25E 14 SENE

OPERATORS PRESENT DURING INSPECTION: Bud Covington and Marvin Richens  
(Names and Titles)

SERIAL NO. OF NOTICE/PLAN ON FILE: U-66363 IS THE OPERATION ACTIVE? No

DESCRIPTION OF OPERATIONS (including access, reclamation, etc.):

Purpose of this inspection was to physically review the 700 ft. two-track roadway; shallow, crescent-shaped excavation; exploration pit (appx. 8'x 8'x 12'); and tailings piles to determine the appropriate reclamation of the claim. After reviewing the 700 ft. roadway, it was decided vegetation had been established well enough not to disturb the area by recontouring. Instead, the area will be reseeded when the rest of the site is reseeded before October 15, 1994. The talus piles will be used to fill in the pit area and the excavation will be recontoured. An area along the hillside below the claim contains a large "berm" of talus material. That material will be used as fill for the exploration pit. A small berm will be left in place to control erosion. It was noted seeding is not to occur until after September 15th and that reclamation is expected to be completed by October 15, 1994.

OTHER AGENCY PERMITS: None Known

IS THE OPERATION IN COMPLIANCE WITH THE NOTICE ON FILE AND/OR THE STIPULATIONS OF THE APPROVED PLAN? No (If NO describe deficiencies):

See above. A certified letter will be sent out to Marvin Richens no later than July 15, 1994, summarizing this inspection. A copy will be sent to Bud Covington, who is actually having the reclamation performed.

T2S, R25E, Secs. 11 & 14 (SLM)

Dear Mr. Richens:

Thank you for taking the time to meet with Ms. D.J. Beaupeurt-Schantz on June 29, 1994, at your Wild Mountain claim. It was noted that Mr. Bud Covington was also present at the inspection.

This letter is to confirm the conclusions reached at the June 29th inspection concerning reclamation of the area. You have agreed to use the talus material at the site to fill in the approximately 8 ft. x 8 ft. x 12 ft. exploration pit. You stated you will use appropriate equipment to contour the bladed area around the pit and push any excess material into the pit, leaving a small berm along the edge of the work area as necessary to prevent erosion. A seeding mix was provided to you in the May 16, 1994, correspondence. A copy of this correspondence is enclosed.

The approximately 700 ft. roadway above the excavated area was reviewed and it was decided the area already has enough native vegetation established that recontouring could possibly cause undue disturbance. This area will be included, however, when reseeding is accomplished after September 15th and before October 15, 1994. You agreed to advise this office when reclamation has been completed.

If you have any questions or concerns regarding reclamation of this area, please contact D. J. at this office at (801) 789-1362 or 781-4462.

Sincerely,

Ronald S. Trogstad  
Area Manager
